THE REPLY FILED 11 April 2006 FAILS TO PLACE THIS APP	PLICATION IN CONDITION FOR A	LLOWANCE.			
1. The reply was filed after a final rejection, but prior to or on the same day as filing a Notice of Appeal. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following time periods:

The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Continuation of 11. does NOT place the application in condition for allowance because: The claims, as amended, remain obvious over Chun in view of Hall et al and Gladman et al, all of record as prior art. Chun in combination with Hall et al and Gladman et al discloses all of the structure in the amended claims with Hall et al teaching the use of an insulating container holder with a pint glass and Gladman et al teaching the use of an interchangeable patch with a fastener attached. Applicant argues that there is no motivation to combine the references, however, all of the references are to beverage container holders and would be within the knowledge of one of ordinary skill in the art. Applicant argues that none of the references teaches an interchangeable patch for identification pruposes or a desire to identify one's glass. in response, applicant is arguing intended use. The references are capable of this intended use.
